Infrared Thermometer -33 to 210 ° C
 After just 0.5 seconds measuring time, the display shows the temperature of a surface to be measured without contact between -33 and + 210 ° C reliably! The distance can be a few meters! The measuring cone has an opening angle of approximately 35 °.
 Applications are e.g.:
 Surface temperatures of windows, walls, ceilings for the detection of cold bridges, auto tires, the skin of burners and heaters, etc. This handy device is only 6.5 x3, 5x2cm in size, has a hold and lock function and a memory for min / max temperature.

23,50

TFA- Mini-Thermo-/Hygrometer

Indoor temperature -10 to 60 °, Humidity: 10 - 99% RH Dimensions 53 x 39 x 15 mm
